THE GOALS

- › Establish plans for improvements
- › Benchmark with international standards
- › Increase the competitiveness on the market

Welcome to the Capability Adviser Web Asses

The Release 8 includes:

- Benchmarking Functionality
- Automatic generation of Assessment Log ®
- Lead Assessor selectable for Assessments
- Improved Save Notes Functionality (screen is blocked during saving)
- Add customizable additional assessment information (OEM, Division, ...)
- Edit/Delete Evidences as Assessor
- Export Evidence List to Assessment Report
- Description for Assessment Type/Class
- Many small bug fixes and improvements

Benchmarking

- Assessments can be exported to Excel in order to benchmark results or find general gaps in processes or base/generic practices
- You can filter assessments by domains or by organisations (business units)
- For the selected assessments the ratings of the lead assessor are exported on a base/generic practice level or on a process level
- Based on the amount of data the script may take some time to prepare the export file

Assessment Custom Information

- Additional attributes for the assessment can be defined using this function.
- Enter the name of the field (e.g. OEM)
- Choose which type of input the information will be:
 - Text: One line of text.
 - Textbox: Multiple lines of text.
 - Listbox: Dropdown with predefined options, one of which the user can choose.
 - Multibox: List of predefined options, of which the user can choose from zero to all by holding down CTRL.
- Create a short but unique word that allows you to put a placeholder for this information into the Word-Template (e.g. {OEM})
- If you chose „Listbox“ or „Multibox“, provide the available options in the „Values“ Form seperated by a semicolon (e.g. BMW;VW;Daimler;)
