

Capability Adviser Release 8.3

Instances

All functions of the tool now support instances.

Power BI API Database

When using Power BI, the data can be directly accessed from the database now.

Automatic Report Assessor

Report assessors can now also be automatically generated for every assessment if a central report assessor is not needed.

Merge notes to Report Assessor

“Copy to Report Assessor” function can now also append notes instead of only overwrite.

Weakness Export

Weaknesses found can be exported in CSV format to reimport into systems like Jira.

RL/RC Comment Shortcut

Clicking on the RL/RC tag will insert it into the comment box of that BP/GP.

Quickly Copy Notes

Copying notes from one GP to another GP is now possible (e.g., SWE.1 2.1.1 to SWE.2 2.1.1)

BP/GP Carpet Placeholders

New placeholders for the Word export have been added (matrix of all ratings).

Rating Reminder

A rating reminder has been added to help remind you of unrated practices in the tool that you probably intended to rate.

Note Formatting and Level Profile

Notes and Level Profile in the Word export have been restyled to be a little easier to read.

Restructured Assessment Insert-Form

Adding assessments is now faster as the project can be created from the "Insert Assessment Form".

Company Branding

It is now possible to use the company logo in the top right of the tool.

Bugfixes

We made further improvements and squashed a few small bugs.
